

ARIZONA EDVENTURES

Squirrels of Arizona

Help the squirrel find its acorn. Watch out for predators!

Several types of squirrels live in Arizona. In the forests, it is likely that you will find Tree Squirrels. They normally build their nests in a tree. In the deserts you will see Ground Squirrels. They typically live in underground burrows. Rock Squirrels are found in many habitats throughout the region, from deserts to mountains. All squirrels like to eat nuts and seeds. Natural predators of squirrels are coyotes, foxes, bobcats, snakes, hawks and owls.
