

# ARIZONA EDVENTURES

## Bald Eagle

America's national bird, the bald eagle, is instantly recognizable with its white head and tail, brown body, hooked yellow beak and yellow eyes. The bald eagle is a large bird with an average wingspan of 86 inches. Arizona bald eagles typically build their nests within a mile of a stream, lake, or river since their favorite food is fish. Nests are usually placed on cliff edges, rock pinnacles, or large trees.
