

ARIZONA EDVENTURES

FISH AZ!

Although Arizona is a desert state, it is blessed with abundant sport fishing opportunities in lakes, reservoirs, ponds, and rivers – all managed by the AZ Game & Fish Dept. At the same time, Arizona's natural heritage represented by our native fishes is in danger being lost. Out of 36 fish species native to Arizona, one is already extinct and 23 are federally listed as endangered or threatened. AZ Game & Fish is helping to protect Arizona's native fish species.
